DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Charles Call on December 21, 2006.

The application has been amended as follows:

Cancel claim 4

In claim 1, line 3, after 'be', add the following:

-- easily --

In claim 1, line 4, ',' has been deleted and --that can be shaped and once shaped retains its shape,-- has been inserted.

In claim 24, line 3, after 'material', add the following: -- with ease--

In claim 24, line 3, ',' has been deleted and --that can be shaped and once shaped retains its shape,-- has been inserted.

Amendments to claims 1 and 24 were made to define over the applied prior art. This system is deemed to be non-obvious over the systems of the prior art.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1:

Art Unit: 2863

The primary reason for the allowance of claims 1 and 24 is the inclusion of: means for projecting a visible image corresponding to said result data onto said surface. It is this feature found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

It should be noted the surface is interpreted as the deformable material that was easily manually shaped to define a surface as claimed.

Claims 2-3 and 5-23 are allowed due to their dependency on claim 1.

Claims 25-28 are allowed due to their dependency on claim 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Malachi et al. (USPUB 2005/0273254) teaches a passive target data acquisition method and system, (Lancaster et al (USPN 6,229,546) teaches a rapid terrain model generation with 3-D object features and user customization interface, Margolin (USPN 6,023,278) teaches a digital map generator and display system Goodwin et al. (USPM 7,103,499) teaches a 3-D selection and manipulation with multiple dimension haptic interface and Rueb et al. (USPN 5,661,667) teaches 3D imaging using a laser projector.
